(a) main field: magnetization in the $x = 0$ plane
$\mathbf{n} \cdot \mathbf{B} = 0$
$(A_z = 0)$
lines run along
$\mathbf{n} \times \mathbf{H} = 0$ $(\partial A_z / \partial n = 0)$
(b) transverse gradient $\mathbf{b} = G(y, x)$
$\mathbf{n} \times \mathbf{H} = 0$
(natural)
lines cross
at right angles
$\mathbf{n} \times \mathbf{H} = 0$ $(\partial A_z / \partial n = 0)$
