
right-hand side b: where the source enters
solution: |E| (shading) and current lines
TES
$\mathbf{K}\boldsymbol{\phi} = \mathbf{b}$
only at electrode nodes: orange in, blue out
same
K
TMS
$\mathbf{K}\boldsymbol{\phi} = \mathbf{b}$
only on the boundary and the interface, where $\sigma \mathbf{E}_p$ meets a jump in $\sigma$
