$\mathbf{A}_{\mathrm{sym}} = \frac{B_0}{2}(-y,\ x,\ 0)$：**绕轴打转**

沿 C 处处相同：$A_t = B_0 r/2$

$\mathbf{A}_{\mathrm{alt}} = B_0(0,\ x,\ 0)$：**全部沿 y**

左右两侧大，上下为零：$A_t = B_0 r\cos^2\theta$

浅红色 ⊙：处处相同的 $\mathbf{B} = B_0\mathbf{e}_z$（指出纸面）；紫色箭头：$\mathbf{A}$；回路 C 的线宽正比于 $\mathbf{A}$ 沿回路的切向分量
